

HURRICANE
125-375 DISCS

CYCLONE
400-630 DISCS

TORNADO
400-750 DISCS

For smaller series and the daily office supplies the Hurricane is the right choice. The upgrading option gives you the flexibility and the assurance that you are well equipped for orders in the future. You always have the possibility to exchange the printer and the drives afterwards and you can choose between Inkjet, Thermal- and Thermal-Retransfer printers.

Up to 30 completely printed and duplicated CDs per hour

InkJet-, Thermal- or ThermalRetransferprint

- * 1-3 CD/DVD drives
- * upgradeable to 10 disc drives
- * industrial robotic
- * standalone with display or PC-Version
- * network ready
- * Windows / Linux
- * photorealistic print

The Cyclone is appropriate for medium sized productions which have to be manufactured on schedule. With this system you produce up to 630 CD or DVD media over night. Further you have the choice between our three proven print procedures.

Up to 50 completely printed and duplicated CDs per hour

InkJet-, Thermal- or ThermalRetransferprint

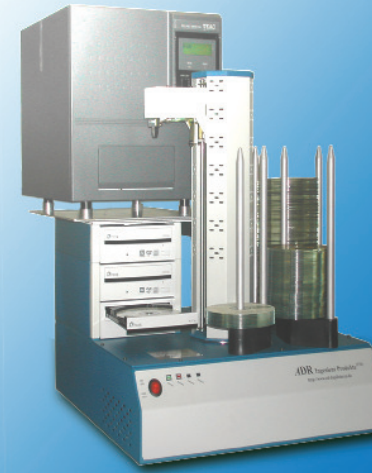

- * 4-6 CD/DVD drives
- * upgradeable to 10 disc drives
- * industrial robotic
- * standalone with display or PC-Version
- * network ready
- * Windows / Linux
- * photorealistic print

While the other models are to be understood as complete production systems including a printer, the Tornado offers you top efficiency and is meant to be for manufacturers who need to achieve the maximum performance. Whether you want to burn or memorize CDs/DVDs the Tornado produces the highest possible throughput with up to 10 drives.

Up to 200 completely duplicated CDs per hour

Up to 45 completely burned DVD's per hour

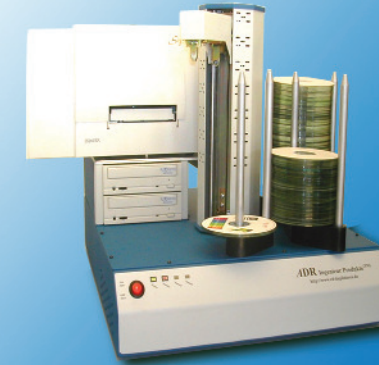

- * 7-10 CD/DVD drives
- * industrial robotic
- * standalone with display or PC-Version
- * network ready
- * Windows / Linux
- * also available as a reading system

TEAC P55
THERMAL-RETRANSFER

Thanks to the innovative thermal retransfer print procedure of the TEAC P 55 you can produce CD and DVD labels in the worlds best quality when it comes to CD/DVD printing. The unbeatable colour brilliance of its photo realistic prints cannot be reached by any other printing technique. It creates a new standard when it comes to printing of visual media. With appropriate inlays the printer is already today able to print on 8 cm CD/DVDs as well as business card cd-r.

- * worldwide the best printing quality
- * water-resistant
- * black-, colour- or photocolor-ribbon
- * network ready
- * Windows / Linux
- * photorealistic prints
- * 400 dpi

Signature Z6
INKJET

Whether you duplicate discs for audio, music, software, video or data, the Signature Z6 delivers all the performance you need for high-volume, high-quality disc printing - at a price that is surprisingly affordable. When reliability, speed and the highest-quality photo-realistic output are required, the Signature Z6 is your best CD/DVD printing solution! With 4800 dpi print resolution and six-colour printing, all of your discs will have the sharpest text, graphics and photos. Print with six-colours instead of four by adding light cyan and light magenta to CMYK and you get absolutely stunning results. Thanks to our new ADR Roller-coater you have even the possibility to make the discs water- and UV resistant.

- * high printing quality
- * network ready
- * Windows
- * black-, colour- or photo cartridge
- * photorealistic print
- * up to 4800 dpi

PowerPro III
THERMALTRANSFER

The PowerPro III with its 300 x 600 dpi print resolution cannot really convince anyone. But even today because of its low printing costs and the immediate water-resistance the thermal transfer printing procedure still has its right to exist. With not even 3.5 cent for a monocolour print this printer is certainly a good solution if its only about printing CDs/DVDs with text.

- * very favourable printing costs
- * water-resistant
- * black- or colour-ribbon
- * Up to 2000 prints per thermal ribbon (black)
- * 300 x 600 dpi

ADR Rollercoater

ADR's newest patented RollerCoater covers InkJet printed CD/DVDs with a protective lacquer to make them longterm water-, scratch- and UV resistant. The lacquer is applied on the medium and afterwards it dries under a UV-light. With approximately 1 Cent sealing costs per medium you attain a professional finishing with favourable consumption costs.

Why an ADR product ?

5 YEARS
GUARANTEE OF PARTS
